

## 350W MYNOX-35PXX serie

industrial grade switching power supply

### SMALLER SIZE low profile

#### Features

- Universal AC input / Full range.
- With stand 300VAC surge input for 5 seconds.

- Miniature size and 1U low profile, low weight.
- Protections: Short circuit / Overload / Over voltage.
- · Cooling by free air convection.
- No load power consumption <0.5W.
- Operating altitude up to 5000 meters (Note 6).
- LED indicator for power on.
- 100% kill load burn-in test.
- · High efficiency, long life and high reliability.
- Extended life high quality capacitors.
- 5 year limited warranty.\*

\*Check special warranty support with your vendor.

#### Applications

- · Industrial automation machinery.
- · Industrial control system.
- Mechanical and electrical equipment.
- Electronic instruments, equipments or apparatus.
- Lighting control and decoration.
- Lighting fixtures control.

### Description

MYNOX-35P series is a 350W single-output enclosed type power supply with 30mm of low profile design. Adopting the input of 115VAC or 230VAC (selectable by switch), the entire series provides an output voltage line of 5V, 12V 15V, 24V, 36V and 48V.

In addition to the high efficiency up to 90%, the design of metallic mesh case enhances the heat dissipation of MYNOX-35P that the whole series operates form - 30°C through 70°C under air convection without a fan. Delivering an extremely low no load power consumption (less than 0.5W), it allows the end system to easily meet the wordwide energy requierement, MYNOX-35P has the complete protection functions and 5G anti-vibration capability; it is complied with the international safety regulations such as TUV EN60950-1, UL 60950-1 and GB4943, MYNOX-35P series serve as a high price-to-performance power supply solution for various industrial applications.

# 350W MYNOX-35PXX serie industrial grade switching power supply

#### Specification

|                         | Model                     | MYNOX-35P05   | MYNOX-35P12 | MYNOX-35P15 | MYNOX-35P24 | MYNOX-35P36 | MYNOX-35P48 |  |

#### Note:

1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.

2. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.

3. Tolerance: includes set up tolerance, line regulation and load regulation.

4. Line regulation is measured from low line to high line at rated load.

5. Load regulation is measured from 0% to 100% rated load.

6. The ambient temperature deranting of 5°C/1000m is needed for operating altitude greater than 2000m (6500ft).

7. The power supply is considered as a component wich will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC test.
